

I LOVE XM radio and can't drive anywhere without it. The traffic and weather info is great and I will be very disappointed if legislation takes this feature away. Local radio stations provide weather and traffic info, but I have to listen to annoying DJ's and tons of commercials before I get the info I need. I pay a premium to listen to XM radio and I do so because I want to hear music, not DJ's and commercials. The fact that XM radio provides accurate and timely traffic and weather info to me is not the reason why I got XM radio, and were this feature taken away by NAB's petition 04-160, I would not look to the local stations to get traffic and weather....I would just go without. Disallowing XM radio from providing traffic and weather is not going to make people go back to local stations - it's just going to upset us for all the wrong reasons. I respectfully urge the FCC to reject NAB's petition 04-160 and I thank the FCC for taking the time to read my thoughts.
